- Consultation by Health Screening Doctor
- Heart screening test reported by Consultant Cardiologist

RM1399*

Complimentary refreshments provided

Health Screening Preparation Guidelines:

- Do remember to fast from 10pm onwards the night before your health screening appointment. A proper fasting duration will provide more accurate results for blood tests. Plain water is consumable up to the time of your appointment.
- Please postpone any routine morning medications until after your blood sample has been taken, EXCEPT for high blood pressure medication, which should still be taken as usual.
- Do inform our staff during registration should you have any health problems.
- Do avoid having a heavy meal before undergoing the stress test.

Health Screening Preparation Guidelines for Ladies:

- Do call us to reschedule your appointment if you are menstruating on the day of your appointment.
- Do book your appointment around day 10 – 14 of your menstrual cycle for the urine & pap smear tests. (This is about one week after your last day of menstruation)
- Do advise us if you are pregnant or suspected to be pregnant as X-ray and mammogram are not recommended for those who are pregnant.
- Mammogram is recommended for women aged 40 years and above only.

* A 6% Sales and Service Tax (SST) is applicable to non-Malaysian citizens in accordance with Malaysian Government regulations. Additional surcharge may apply.
